## **PUBLIC SERVICE ANNOUNCEMENT**

The City of Little Falls has been directed by the Minnesota Department of Natural Resources to implement water reduction measures within the City of Little Falls. The DNR, due to 42% of the State being in an "Extreme Drought Warning" phase, has instructed the City to not produce more than 1.25 million gallons of water a day.

Because of this notification, the City is implementing a lawn watering ban within the City. Residents may continue to water shrubs, bushes, flowers, vegetable garden and trees. Community sports fields are exempt from this ban. **This applies to all residents and businesses using City water, well water or a sand point for lawn watering.**

The Minnesota Department of Health or the Minnesota Department of Natural Resources may have restrictions for other water sources (i.e. river water, etc.). Please check their offices to ensure compliance.

This **lawn watering ban** will continue until further notice.

Questions on this lawn water restriction are directed to contact City Hall (320) 616-5500.
